

BIRTH WEIGHT RELATED INDICATORS

Definition - Number of births within each 500g weight interval expressed as a proportion of all live and stillbirths calculated by gestational age and vital status at birth for singletons and multiples

Table 1 - Detailed distribution of birthweight for all births

Year	Total births	Number of total births by birthweight group in grams											Percentage of total births by birthweight group in grams											
		≤499	500-999	1000-1499	1500-1999	2000-2499	2500-2999	3000-3499	3500-3999	4000-4499	4500-4999	≥5000	Not stated	≤499	500-999	1000-1499	1500-1999	2000-2499	2500-2999	3000-3499	3500-3999	4000-4499	4500-4999	≥5000
